

# Preparing Students for What's Next in Work...

Continued from page 19...

This assertion is consistent with findings from the Camber Collective. This social impact consulting group identified four key life experiences students can consider and explore that positively affect lifetime earnings, including:

- \* Completing secondary education
- \* Graduating with a degree in a high-paying field of study
- \* Receiving mentorship during adolescence
- \* Obtaining a first full-time job with opportunity for advancement

**Students aiming to equip themselves with the skills and experience necessary for the future workforce can seek:**

\* Learning opportunities that are designed with the future in mind. For example, learning experiences offered through Junior Achievement reflect the skills and competencies needed to promote economic mobility.

\* Internships or apprenticeships that provide hands-

on experience and exposure to a career field that can't be found in a textbook.

\* Volunteer or extracurricular roles that develop communication and leadership skills. Virtually every career field requires these soft skills for growth and greater earning potential.

\* Relationships that provide insight and connection. Networking with individuals who are already excelling in a chosen field, as well as peers who share similar aspirations, offers perspective from those who are where you wish to be and potentially opens future doors for employment.

\* Courses that offer introductory insight into a chosen career path. Local trade or technical schools and other training organizations may even offer certifications that align with a student's area of interest.
